Core Concept:

here is a summary of the text :

Core Concept:

the video introduces 10 essential terms for beginners in the stock market :

Definition:

1. bull market : a period when the stock market is generally rising, often lasting a few months to years. it is characterized by overall upward momentum with some fluctuations.

Definition:

2. quantitative easing (qe) : the federal reserve ' s policy of printing money, leading to inflation and higher stock prices as more money flows into the economy.

Definition:

3. bear market : the opposite of a bull market, where stock prices decline by at least 20 % from their peak. it is a downward trend that can last for several months.

Definition:

4. shorting : a strategy where investors bet on a stock ' s price decline. they sell high and buy low, aiming to

Condensed Notes on Video

profit from falling prices, often targeting companies with negative prospects.

Definition:

5. quantitative tightening : the reversal of QE, where the federal reserve reduces the money supply, typically leading to lower stock prices as money is taken out of the economy.

Definition:

6. dead cat bounce : a temporary price increase during a downward trend, followed by a continued decline. it ' s a short - lived rebound that can mislead amateur investors.

Core Concept:

7. don ' t fight the fed : emphasizes the federal reserve ' s significant influence on the stock market. their monetary policies, such as money printing or tightening, can drive the market up or down, so it ' s advisable to follow their lead.

Definition:

8. dollar cost averaging (DCA) : an investment strategy where investors buy stocks at different prices over time to average out the purchase price. it helps reduce risks and allows investors to benefit from price fluctuations.

Definition:

9. tax loss harvesting : selling losing stocks to offset capital gains, reducing the tax burden on investment profits.

Definition:

10. support and resistance : key technical analysis terms referring to price levels where a stock tends to find buying (support) or selling (resistance) pressure. these levels can change as the stock breaks through them.

Core Concept:

the video aims to educate beginners about these terms, offering insights into market dynamics and investment strategies. it encourages viewers to subscribe for more educational content and provides a link for a free stock account.
